Notes on Infantry Quick Reference Table

Combat Load: The amount of combat supplies that the unit can carry with it under its own power, or in addition to any transport requirements. For instance, a Zil truck carries 2 squads of Reg Infantry, as well as its own combat load of 4 combat supplies and 8 additional combat supplies carried by the Infantry it is transporting, making 12 combat supplies in all.

Other Load: This rating in Lbs, is the amount of NON SUPPLY munitions that a unit can carry in addition to its combat load of supplies. For instance, a Militia Squad could carry 2 supplies and 6 RPG-7s.

Marching Range: This is the distance that the given unit can travel in one day. Bearing in mind that a turn is considered to be three days, a Field CP could travel 30 miles ON FOOT. Note that Infantry units using Mule Trains are considered to be marching.
